To whomever it may concern

I, Arun S, Associate Software Engineering Manager, attest that Abhimanyu Athikayan, has been an employee of the company since December 2019 until May 2021. He occupies the following position:

Senior Software Engineer – December 2019 until May 2021

Main duties and responsibilities:

- Design and develop data-driven end-to-end test automation framework in Java using Amazon SDK, RestAssured library and Selenium Webdriver that performs automation testing on Customer Experience API's, Google Apigee GUI and Amazon S3 bucket cloud-based enterprise application.
- Build Performance testing scripts using Apache Jmeter to measure performance of the Global Model Match Maker project using metrics like Throughput, Response time and Network latency.
- Develop micro-services using Java Spring Boot framework for the Nissan Facebook leads integration project. Overlooking the Sprint planning and Defect Management.

Number of work hours per week: 40 hours.

Annual Base Salary: INR 13,50,000/-

Abhimanyu Athikayan is representing the Marketing and Sales technology unit as 'Quality Champion'. As part of this initiative, he has undertaken the following tasks:

- Analyze specific quality metrics that can be leveraged through the phases of the different projects.
- Identify possible enterprise systems that can configured for these metrics to measure projects data against them.
- Formulate a workable process to enable a sustainable way to measure, report and act on these KPIs.

If you have any questions, please contact the undersigned.
Sincerely,

Arun S
Associate Software Engineering Manager
